What are the features for Simple SKU Generator plugin?

The total numbers of SKU that Simple SKU Generator plugin can create is varies between 6 to 12 digits/letters.

There are 4 options of digits to create barcode by using Months, Numbers, Letters, Years, Dates and Product Amounts.

- (1) Month: 2 digits, Number(1): 1 digit, Number(3): 3 digit, Letter: 1 digit or Blank.
- (2) Year: 4 digit.
- (3) Date: 2 digit.
- (4) The amount of products you have: 4 digits.

The Max is 13 digits and Min is 8 digits.

The Blank purpose is to shorten the digits for EAN-8 or for your own preference.
There are Blank for Month/Number/Letter, Year, Date.

I wouldn't advise shorten less than 8 digits.

It's hard to read and follow which SKU is assign to which product once scan the barcode.

The digits can be used to create barcode digits for
EAN-8, UPC-A, EAN-13, CODE-39, CODE-93, EAN-128, CODE-128, ITF, QR, DMTX

Remove

Export as CSV

Thank you for creating with [WordPress](#).

Version 5.0

The SKU display page has 2 buttons what are their functions?

The **Remove** button will **ONLY** remove/delete all the SKU from the SKU table not from the Wordpress database.

It won't delete the products on your websites.

It's best to remove the SKU list after you export the CSV that contain the SKU.

The **Export CSV** button will export the CSV.

There will be no header on the CSV file.

If you are curious what is the header.

This is the header:

The first column is the **ID**.

The second column is the **post_title**.

The third column is the **sku**.

The image below illustrate what I mention above:

Display SKU

Opening woo_sku.csv

You have chosen to open:
 **woo_sku.csv**
which is: Microsoft Excel Comma Separated Values File (2.1 KB)
from: data:

What should Firefox do with this file?

☐ Open with

Microsoft Excel (default)

☒ Save File

☐ Do this automatically for files like this from now on.

OK

Cancel

How do I upload the SKU CSV file for the products and keep the old SKU?

I will use the demo SKU products on my website to show you how to upload the old SKU with the new ones.

For example I will keep these 2 old SKU on my website:

Product 17 - 122019150016

Product 24 - 122019150023

I highlight the changes in yellow on the image below.

If you open the CSV file and notice this format 1.22019E+11.

Click on **General** and pick **Number** and then **decrease decimal**.

1.22019E+11 = 122019150023

You might have to sort the SKU to match with the product name you want to assign with the SKU.

All you have to do is copy the SKU and open a new sheet and copy it to the new and sort it.

Then copy the sort SKU to the original spreadsheet and save it.

The image below illustrate what I mention above:

woosku.csv - Microsoft Excel non-commercial use

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V	W	X	Y	Z

36	339	Product Thirty Six	12019150035																							
37	340	Product Thirty Seven	12019150036																							
38	341	Product Thirty Eight	12019150037																							
39	342	Product Thirty Nine	12019150038																							
40	343	Product Forty	12019150039																							
41	344	Product Forty One	12019150040																							

To import the CSV file, you need an CSV importer.

Go to **Tools**, then click on **Import**.

You will see **WooCommerce products (CSV)**.

Click on **Run Import**.

Then upload the **woo_sku.csv** file and check the checkbox for **Update existing products**.

Then click the **Continue** button.

The screenshot shows the 'Import products from a CSV file' interface. At the top, a progress bar has four steps: 'Upload CSV file' (active), 'Column mapping', 'Import', and 'Done!'. The main heading is 'Import products from a CSV file', followed by the description: 'This tool allows you to import (or merge) product data to your store from a CSV file.' Below this, there are two sections. The first section, 'Choose a CSV file from your computer:', includes a 'Browse...' button and the filename 'woo_sku.csv', with a note 'Maximum size: 2 MB'. The second section, 'Update existing products', features a checked checkbox and the text: 'Existing products that match by ID or SKU will be updated. Products that do not exist will be skipped.' At the bottom left is a link 'Show advanced options', and at the bottom right is a purple 'Continue' button.

Upload CSV file Column mapping Import Done!

Map CSV fields to products

Select fields from your CSV file to map against products fields, or to ignore during import.

Column name	Map to field
304 <i>Sample: 305</i>	ID
Product One <i>Sample: Product Two</i>	Name
12019150000 <i>Sample: 12019150001</i>	SKU

Run the importer

The image (L) above show how to set up the fields.

Upload CSV file Column mapping Import Done!

Import complete! 47 products updated

View products

The image (R) above show the final results updated correctly.

Now match the **Map to field**:

The first row is the **ID**.

The second row is the **Name**.

The third row is the **SKU**.

Then click on the **Run the import** button.

The images below show you the results:

I highlight the 2 changes in blue to show the SKU has been updated:

What happened if I deactivate the plugin or delete the plugin?

If you deactivate the plugin it will stay on the plugin page and the SKU tables will be still on wordpress database. But if you delete/remove the plugin it will delete the folders, files and also the tables from the wordpress database.
